Offered to healthcare professionals from around the world

Minimum of 2 hours of commitment – self-paced

Official Ashoka Certificate provided

Course Description

In our rapidly changing world, employee skills such as intrapreneurship, agility, teamwork, empathy, and collaborative leadership are critical to an institution’s ability to innovate and grow. Valuing these skills brings opportunity and competitive advantage, while underestimating them can lead to redundancy and inefficiency.

Social intrapreneurship is a methodology to spark, cultivate, and scale social innovation within institutions. Intrapreneurial employees capitalize on trends –such as technology advancement and increased globalization– and strategically solve pressing issues. By applying creativity and calculated risk-taking, intrapreneurial employees foster a culture of innovation and agility—key for any thriving business.

Ashoka, the world’s largest network of social entrepreneurs, and Boehringer Ingelheim, a leading international health company, have partnered to create a six-week online course: ***Social Intrapreneurship for Innovation in Health***. This course is part of the global “Making More Health” initiative to improve access to healthcare for people, animals, and communities around the world.

In this course, you will connect with a global community of health professionals from across private, public, and nonprofit sectors, and convene to learn intrapreneurial strategies for creating social and business impact in the health space.

Course Modules

Module 1: The Business Case for Social Intrapreneurship

Module 1 explores the concept and definition of social intrapreneurship and investigates the business case for fostering intrapreneurship within institutions. Participants are exposed to real world examples and applications to the health sector.

Module 2: Intrapreneurial Challenges & Opportunities

Module 2 focuses on defining and understanding the challenges surrounding social intrapreneurship through market research and patient needs. We review examples of these challenges, paying attention to communicating and framing the problem in a compelling and accessible way.

Module 3: Strategies for Advancing Social Innovation Within Your Institution

Co-creation allows businesses to spark the next generation of sustainable solutions through working with the social sector. New business models and ideas rise out of close collaboration with non-traditional partners, beginning with social entrepreneurs. Module 3 brings out real world examples of products, services, or business models created through co-creation.

Module 4: Co-Creation Part I: Leveraging on Shared Value

Social entrepreneurs create solutions for society's most pressing social, cultural, and environmental challenges. Looking to examples that have reshaped global industries, in Module 4 we connect the dots between game-changing innovations and social entrepreneurs to learn how they have influenced new systems, mindsets, and ways of working.

Module 5: Co-Creation Part II: Idea Development and Pitching

Pitching and developing ideas are important steps for social intrapreneurs during the early stages of their innovation. This module will review fundamentals of both, offer best practices, and look at case studies.

Module 6: Final Review and Wrap-up

The final module of the course is an exercise in reflection and an opportunity to review all the content covered to date. It also enables participants to crystallize the professional connections they made throughout the course and discuss concepts already explored.

Course Features and Learning Material

20 Videos

15 Readings *

30 Discussion Forums

6 Live Webinars

2 Office-Hour Session

* Includes case studies, articles, and excerpts from books/publications

In this course, participants will:

- Prepare to lead social and business impact within their institution
- Gain skills and strategies to garner internal and external support for new ideas
- Learn how to collaborate and advance innovation in a bureaucratic setting
- Develop intrapreneurial strategies for cross-sector collaboration, co-creation, and project-prototyping
- Connect with a network of intrapreneurs and innovators to exchange ideas and receive ongoing feedback and support for their initiatives
- Engage with Ashoka's network via Ashoka Fellow case studies, learning opportunities, and experts in social intrapreneurship and entrepreneurship around the world.

Course Development

As the first and largest global network of social entrepreneurs, Ashoka understands how leading changemakers across sectors are tackling problems and reimagining systems for the common good. This course is part of the Making More Health initiative, a partnership between Ashoka and Boehringer Ingelheim.

Making More Health is a global initiative that aims to create a healthier world for individuals, animals, and their communities. By supporting social intra/entrepreneurs and innovation, MMH makes social impact, helps identify creative business models, and benefits employees, organizations, and society.

Changemakers is an Ashoka program that uses the power of digital technology to equip everyone to play a role in positive change. We launch initiatives in partnership with companies and foundations, such as innovation challenges, courses, communications & insights, and more, to empower individuals with the tools, resources, and network to succeed as agents of change in their communities and work environments. Changemakers developed and produces this course.
